

# *See it Right!*®

A cost-effective, dynamic program  
to overcome visual perceptual problems.

## **TRAINING**

### **Individual Assessment**

We have various training services available for your staff. Professional development training can be scheduled with individual schools, school districts, educational service areas or teachers and specialist groups such as occupational therapists, or assistive technology personnel. We also train staff from clinics working with struggling students.

We can train your whole staff at the same time in a 6-hour seminar. This training can be scheduled on an inservice day during the week or on Saturday, if desired. The goal of this workshop is to prepare your staff to assess students with visual-perceptual problems which interfere with reading and writing skills and to intervene using color. How to monitor and follow up with the student and the parents is also covered.

Ideally training should include those members of your staff who have assessment and intervention responsibilities (Title I, Reading Coaches, Reading Specialists, Special Education staff, et al.)

### **Consulting Fees**

Our daily consulting rate is \$2,500. The materials needed by your staff and students will be decided with the school staff. Additional charges for travel (airfare and/or mileage) and hotel costs.

### **Trainers**

Workshops are given by Dorothy Henson-Parker, a Licensed Educational Psychologist, or consultants who are experienced and trained educators who have used the See it Right!® assessment successfully with students for years.

### **Materials**

The training and assessment materials for the six-hour individual seminar are contained in the Short Form Assessment Kit. Each participant will need a set of these materials for the training and for the testing of students.

Please call with any questions.
